Summary:

Dedicated and detail-oriented UI/UX designer with expertise in mockups, visual design, and prototyping. Skilled in using Figma, Illustrator, and Photoshop to create user-centered designs. Strong problem-solving abilities with experience in front-end development. Excellent team player with a commitment to enhancing user experience through research, innovative design, and clear communication.

Technical Skills:

- Design Tools: Figma, Adobe XD
- Development: HTML, CSS, Javascript
- Design & Prototyping: UI/UX Design, Wireframing, Prototyping

Experience:

Web Development (Remote Intern) – Prodigy Infotech | March 2022 – April 2022
Projects: Responsive Landing Page, Stopwatch Web Application, Tic-Tac-Toe Web Application, Personal Portfolio Website, Weather App.

- Completing day to day tasks given by the company related to frotend technologies; HTML, CSS, Javascript, React.
- Problem solving skills related to web development from beginner to intermediate level.

Search Engine Optimization (Intern) – Gyapu Marketplace | July 2022 – Sept 2022

- Conducting research on competitors' websites and SEO strategies to identify opportunities and best practices.
- Assisting with off-page optimization strategies such as link building, which involves acquiring high-quality backlinks.

Projects:

WireHub – LAN Messenger
Tech Stack: Python, MySQL, MySQL Workbench

- This is a LAN Messenger based on Python Language, which was made for banking sectors to improve and secure their communications but it can also be used in other sectors.

Culture Craft – Personal Business Website
Tech Stack: Figma

- This is a personal business website design, created by using Figma where first idea was to create it's wireframe. Here we can see that it is really clean and simple. This website is in the progression phase.
